EDUCATION

University of Southern California, Marshall School of Business – Los Angeles, CA **Expected May 2027**

Master of Science in Business Analytics (STEM) | GPA: 3.7 / 4.0

Relevant Coursework: Machine Learning, Statistical Learning, Python Data Analysis, Optimization

Zhejiang University, Chu Kochen Honors College – Hangzhou, China **Jun 2025**

Bachelor of Arts, Translation and Interpreting | GPA: 4.0 / 4.0

Minor: Intensive Training Program in Innovation and Entrepreneurship (ITP)

Relevant Coursework: Statistics, Linear Algebra, Calculus, Econometrics

EXPERIENCE

Ant Group – Hangzhou, China **May 2026 – Aug 2026**

Business Intelligence Engineer Intern, Business Decision Department

- Independently built an LLM-Wiki insurance intelligence agent automating monitoring, ingestion, search, and quality checks across 20+ sources and 500+ entity pages, updated daily; earned the department's Q2 AI Pioneer recognition.
- Built data retrieval and analysis workflows for Xiaokang; contributed to knowledge packaging, table access controls, and digital employee interface decisions for business stakeholders. The BI agent covered 30+ use cases and 80% of routine data needs.
- Cleaned policy cancellation funnel data and re-analyzed A/B experiments to identify drop-off points and validate retention interventions, helping improve retention among users seeking to cancel policies by 4 percentage points.

Meituan – Shanghai, China **Feb 2025 – May 2025**

Data Analyst Intern, Core Local Commerce

- Analyzed 100M+ transactions with SQL and built weekly and monthly reports on transactions, traffic, retention, and costs; used BI dashboards and visualizations to inform business performance reviews and product development priorities.
- Built Hive tables to segment new and reactivated users and identify high-value cohorts; partnered cross-functionally with user operations on targeted engagement and retention strategies, contributing to 10% growth in user activity and repeat purchase rates.

DiDi Global – Hangzhou, China **May 2024 – Sep 2024**

Data Analyst Intern, Two-Wheeler Business, B2B Strategy

- Analyzed operational data for 1M+ electric bikes with SQL; defined work-order validity and completion metrics and built dashboards to guide bike deployment and removal at locations frequently affected by regulatory requirements.
- Evaluated bike deployment pilots with SQL and dashboards tracking incremental orders and activation rates; compared post-deployment ride revenue with field labor costs for deployment, positioning, and transport (cumulative pilot ROI above 1.3).

Boston Consulting Group – Shanghai, China & Remote **Dec 2023 – May 2024**

Management Consulting Intern, Greater China

- Analyzed industry and competitor data for an electric vehicle manufacturer's battery supply chain; identified cost drivers and bottlenecks and presented cost-reduction initiatives and implementation steps.
- Assessed market and consumer research for a plant-based beverage brand; identified growth opportunities in freshly prepared beverages and built presentation materials recommending market expansion and resource allocation priorities.

PROJECTS & COMPETITIONS

USC DSO 530 Insurance Analytics Case Competition | 1st Place **May 2026**

- Predicted loss cost for 39,928 auto insurance policies (89% zero claims) with engineered driver and vehicle features.
- Tuned 9 tree and boosting models; Tweedie-loss LightGBM/XGBoost cut validation MSE 4–7% vs. a decision tree.

SKILLS & INTERESTS

AI & Automation: AI Agents, Harness Engineering, AI Evaluation, Codex, Claude Code

Data & Analytics: SQL (Hive), Python (pandas, scikit-learn), XGBoost/LightGBM, A/B Testing, Tableau, Power BI, Excel

Languages: Mandarin (Native), English (Fluent), Spanish (Basic)

Interests: Basketball, Swimming, Go
